

RMVR Fall Sprints

Pueblo Motorsports Park, September 9-10, 2023

Rocky Mountain Vintage Racing will celebrate the arrival of fall in our 40th Anniversary Season with a weekend of classic vintage sprint races at Pueblo's historic road course. And to add a touch of whimsy, Chevrolet's controversial Corvair is the featured marque.

Sneer if you will, non-believers; the Corvair chalked up an impressive list of American 'firsts' when it hit the streets as a 1960 model, and nearly 1.8 million Corvair vehicles were produced before production ceased on May 14, 1969. Many young enthusiasts of the era learned about oversteer behind the wheel of a Corvair.

And here's a little-known fact: The first air-cooled flat six Porsche was built by Chevrolet; a 356 coupe converted as a Corvair drivetrain test vehicle! Click [HERE](#) for additional Corvair historical tidbits.

We don't envision a Corvair run group or flood of Corvair racers in Small Bore – the plan is to invite local and regional Corvair clubs to drive their cars to the track to enjoy some lunchtime parade laps. A parking area will be reserved for the Corvairs, and we'll have the opportunity to swap lies with the owners at Saturday evening's Happy Hour.
